

## TUNING THE GUITAR

The best way to tune your guitar is using an electronic tuner. To tune the guitar you need to know the names of the strings. The names of the strings starting from the big 6<sup>th</sup> string are E, A, D, G, B, and E. An easy way to remember them is "**E**ddy **A**te **D**ynamite. **G**ood **B**yed **E**ddy."
