

CHORDS

A chord is defined as at least three notes played simultaneously. The chord diagram below indicates how to play the G chord. The circle with a number 3 inside, on the first string, means that you place your third finger on the third fret on that string. The empty circles above the 2nd, 3rd and 4th strings mean to play those strings open (without being fingered). The "X" symbols above the 5th and 6th strings mean that you do not strum those strings. So you strum only the first four strings, simultaneously.

This diagram is used to illustrate chords, scales and arpeggios.
